

a) Provided in separate files in this zip.

b) `<html></html>` - Declaring the page is in html

`<head></head>` - To write page metadata

`<link>` - To link the separate css file

`<meta>` - To allow characters outside of original ASCII

`<title></title>` - To put a title to the tab when opened online

`<body></body>` - Where all the contents of the page is put

`` - To create the navigation bar

`` - To list the sections/separate buttons of the navigation bar

`<a> ` - To link the buttons to other pages/html files

`<h1></h1>` - Header text to bring more attention to what's written in it

`<p></p>` - Smaller text for more information and longer explanations

`<div></div>` - Divides a certain section in the code to be manipulated/changed

`` - To add images onto my page

`<h2></h2>` - To have font that is medium-large size

`<h3></h3>` - To have font that is slightly larger than the one in the `<p></p>` tag

c) I usually use Firefox. Since this question was asked I also opened it on Google Chrome and Safari. There wasn't a difference between Firefox and Google Chrome but for Safari, images either did not fit or were brought down to one per line rather than two that I saw on the other two browsers.

d) I estimate I spent around 3-4 hours since I spent some time figuring out how to upload and view it and having to fix errors. I would say I spent around 1-1.5 hours on readings and research and 2-3 hours on code experimentation.

Website validation on the next pages

CSS Validation

The W3C CSS Validation Service

W3C CSS Validator results for <https://louieevelyn.github.io/FirstWebsite/index.html> (CSS level 3 + SVG)

Jump to: Validated CSS

W3C CSS Validator results for <https://louieevelyn.github.io/FirstWebsite/index.html> (CSS level 3 + SVG)

Congratulations! No Error Found.

This document validates as [CSS level 3 + SVG](#)!

To show your readers that you've taken the care to create an interoperable Web page, you may display this icon on any page that validates. Here is the XHTML you could use to add this icon to your Web page:

```
<p>  
  <a href="https://jigsaw.w3.org/css-validator/check/referer">  
      
    Valid CSS!  
  </a>  
</p>
```

```
<p>  
  <a href="https://jigsaw.w3.org/css-validator/check/referer">  
      
    Valid CSS!  
  </a>  
</p>
```

(close the img tag with > instead of /> if using HTML <= 4.01)

Nice to meet you!

My name is Evelyn Louie. (Student Number: 501124587)

This is my first time working with HTML since high school. My skills are currently very basic but I hope to improve them with this course. I have made a website previously but I did not know how to center images properly and it looks very messy. I hope that by the end of the semester I will be able to create a functional yet aesthetic website.

Some things about me

I am a 3rd year computer science student at Toronto Metropolitan University. I currently work a part time job at a bubble tea store. I like to draw and read manga/manhwa in my free time. I also like to play games with friends and listening to music when I can. My favourite artists right now are Laufey and Olivia Rodrigo.

Games I play

Some of the games are Valorant, League of Legends, Genshin Impact and Honkai Star Rail. Valorant is a first person shooter game in which players typically play in teams of five against another team of five. The game is basically a capture the point game and the first to win 13 rounds, wins overall. League of legends is another team game in which five players are against another five players. They fight until they reach the base of the other team. First to destroy their main point in base, wins. Genshin Impact is a roleplaying game which involves exploring and boss battling. Honkai Star Rail is almost the same except that it is turn based. I mainly play Honkai Star Rail nowadays, logging in everyday to upgrade my characters.
